SUMMARY

Front-End Engineer with extensive experience in building, scaling, and optimizing high-performance web applications using **React, Next.js, TypeScript, and Tailwind CSS**. Proven track record in delivering clean, maintainable architecture and leveraging **Headless CMS (Strapi)** for dynamic content management. Deep foundation in **C++ and C#**, bringing strong algorithmic problem-solving, code optimization, and performance profiling to complex user interfaces. Adept at integrating **modern AI tools** into development workflows to accelerate delivery and engineer resilient, ATS-optimized web solutions.

PROJECTS

SaaS Dashboard | React, Next.js, TypeScript, Tailwind CSS

Architected and developed a modern, responsive SaaS dashboard featuring reusable components and a clean, intuitive UI, leveraging local JSON mock data to simulate real-world application workflows without a backend.
